

RODRIGO MENDOZA CORTÉS

Agentic AI & Data Engineer · Data Analytics Specialist · Power BI Developer

Mexico City, Mexico | (52) 55 6087 2387 | rdgo.mendoza@gmail.com
rmendoza-code.github.io | linkedin.com/in/rodrigomzc | github.com/rmendoza-code | [Tableau Public](#)

SUMMARY

Data and AI engineer with 5+ years bridging supply chain operations and data-driven decision-making. Built AI-powered data agents in Microsoft Fabric connected to live semantic models with governed, validated responses. Designs AI agents with tool calling, memory, intent routing and the Model Context Protocol (MCP); builds retrieval-augmented generation (RAG) pipelines with embeddings and vector databases; and integrates LLMs into business processes through webhooks and REST APIs. Experienced in Microsoft Dynamics 365 F&O implementations and Lean Six Sigma (Black Belt). Currently completing the AI Technologies Specialist program at Tecnológico de Monterrey. Architecture, code and live demos: rmendoza-code.github.io/#ai-lab ([capabilities-to-evidence map](#)).

PROFESSIONAL EXPERIENCE

Centro Internacional de Mejoramiento de Maíz y Trigo (CIMMYT)

Data Analytics Specialist

March 2026 – Present

- Built AI-powered data agents in Microsoft Fabric for business-area reporting, connected to live semantic models with governed, validated responses ([recreation](#)).
- Migrated a static Excel report requiring 16–20 hours of monthly manual preparation to Power BI Service, with 2-hour scheduled refresh and role-based Row-Level Security.
- Built an automated comment-capture solution with Power Automate, enabling users to submit contextual comments within the report and track them in the dashboard.
- Delivered two days of hands-on Power BI training to internal staff, covering star schema design and 28+ DAX measures.

GCG Consulting

Supply Chain and Power BI Consultant — Tren Maya Project

February 2025 – February 2026

- Led the implementation of integrated asset maintenance management solutions with Microsoft Dynamics 365 Finance and Operations, CRM Field Service and Power BI.
- Applied Microsoft's end-to-end process methodology for ERP deployments, focusing on system integration and business process optimization; coordinated with national and international vendors.
- Conducted process analysis sessions, translated business requirements into technical specifications, designed solutions with cross-functional consultant teams and trained key users.
- Developed Power BI dashboards to monitor critical KPIs for strategic decision-making ([RAMS preview](#)).

BPC Consulting

Supply Chain and Microsoft Dynamics 365 Finance & Operations Consultant

April 2024 – October 2024

- Implemented Microsoft Dynamics 365 F&O for a manufacturing company, deploying the Procurement and Sourcing, Warehouse Management and Sales modules to optimize supply chain operations.

Indep Business Partner

Supply Chain and Operations Consultant

July 2022 – April 2024

- Executed a digital transformation success case recognized by Microsoft, guiding BACO, a leading stationery manufacturer, from requirements gathering to go-live.
- Applied the APICS SCOR framework to optimize business processes and trained operational and administrative teams in ERP usage, increasing supply chain efficiency.
- Implemented the Warehouse Management System in Dynamics 365 F&O, covering receipts, internal movements and shipments, and designed warehouse models for raw materials, work-in-process, finished goods and sales picking areas, improving inventory accuracy and traceability.

Johnson & Johnson

Health Care Compliance Intern

April 2021 – February 2022

- Developed Power BI dashboards and Excel reports for business intelligence monitoring, reducing critical incidents by 30% through predictive analytics.
- Optimized processes through internal audits and report automation, improving data quality and governance; centralized information in SharePoint for regional teams.

I-Wey Textil

Continuous Improvement Trainee

July 2019 – August 2020

- Applied DMAIC to implement 5S in warehouses, increasing productivity by 20%; documented workflows in BPMN (Bizagi) and managed the implementation of a point-of-sale system.

SELECTED AI PROJECTS

Multi-Agent Hotel Concierge — Dify, OpenAI gpt-4o-mini

[Live demo](#) · [Code](#) · [Overview](#)

- Question classifier routes each guest message to three function-calling agents (reservations, CFDI invoicing, availability) with conversation memory and tools: hotel knowledge source, Google Sheets, Tavily and Wikipedia.

Internal Assistant with Custom MCP Server — n8n, OpenAI, Anthropic

[Code](#) · [Overview](#)

- Webhook intake, classification sub-workflow and rule-based routing to Slack, Notion, Gmail or Google Sheets; an LLM agent uses an MCP client against a self-built MCP server exposing calendar, email and web-search tools; global error workflow with Slack alerts.

LexMex Legal RAG Chatbot — Langflow, AstraDB (Tec de Monterrey)

[Code](#) · [Overview](#)

- End-to-end RAG over the Mexican Federal Civil Code: chunking (1,000/200), text-embedding-3-small, AstraDB vector store with top-4 similarity search and gpt-4o-mini (temperature 0.1) with a grounded prompt that answers “I don’t know” when context is insufficient.

LLM Automations for Business Processes — Make, n8n

[Code](#) · [Overview](#)

- Voice agent (Vapi) that books meetings via webhooks and Google Calendar; invoice data extraction to structured JSON into Google Sheets; automated meeting minutes; Telegram voice-note assistant.

Delivery Route Optimization (TSP) — Python (Tec de Monterrey)

[Code](#) · [Results](#)

- Compared simulated annealing, a genetic algorithm and 2-opt hill-climbing on a 15-stop TSP over five runs each; all reached the instance optimum, with the genetic algorithm the most consistent and hill-climbing the fastest.

In progress: Hotel Concierge in LangGraph — Python

[Roadmap](#)

- Porting the concierge to Python and LangGraph with RAG over a vector database, input and output guardrails, structured tax-data validation, human-in-the-loop approval and evaluation.

All sanitized agent and workflow exports on [GitHub](#) · End-to-end Power BI case study: [Procurement Analytics](#)

EDUCATION

Tecnológico de Monterrey

February 2026 – Present

Artificial Intelligence Technologies Specialist

- Generative AI fundamentals, prompt engineering and LLM agents, automated reasoning, metaheuristics, data preprocessing and unsupervised learning; LLMs, RAG, multi-agent systems, LangChain, LangGraph and MCP, with exposure to Hugging Face and PyTorch.

Universidad Nacional Autónoma de México (UNAM)

2017 – 2022

Bachelor of Science in Industrial Engineering

CERTIFICATIONS AND TRAINING

Lean Six Sigma Black Belt — Universidad Nacional Autónoma de México, March – September 2024

Platzi (2025): Workflows Profesionales con n8n; Databricks: Arquitectura Delta Lake; Data Warehousing & Data Lakes; Python para Ciencia de Datos; Business Intelligence Fundamentals; SCRUM Professional

TECHNICAL SKILLS

AI and Agents: LLMs, RAG, embeddings, vector databases (AstraDB), tool calling, Model Context Protocol (MCP), LangChain, LangGraph, prompt engineering, OpenAI and Anthropic models, Dify, Langflow

Automation and Integration: n8n, Make, Power Automate, webhooks, REST APIs, SharePoint, Google Workspace

Data and BI: Python (Pandas, NumPy), SQL, PySpark, DAX, Power Query (M), Microsoft Fabric, Power BI, Tableau, Databricks (Delta Lake), data warehousing, ETL/ELT, OLAP/OLTP

ERP and Methods: Microsoft Dynamics 365 Finance & Operations, SCOR model, Lean Six Sigma, DMAIC, predictive analytics
