● PROFILE

Data & AI engineer with **5+ years bridging supply chain operations and data-driven decisions**. At CIMMYT I built **AI-powered data agents in Microsoft Fabric** connected to live semantic models with governed, validated responses. I design agents with **tool calling, memory, routing and MCP**, RAG pipelines with **embeddings and vector databases**, and LLM automations integrated with business systems through webhooks and APIs. Background in Dynamics 365 F&O implementations and Lean Six Sigma (Black Belt); currently in the AI Technologies specialization at Tecnológico de Monterrey. **Every project below links to a live window in my portfolio.**

● SELECTED AI PROJECTS – CLICK TO OPEN

FABRIC DATA AGENTS

CIMMYT · PRODUCTION

AI data agents on Microsoft Fabric answering business questions in natural language over live semantic models, with governed responses that match the official dashboards.

WINDOW

CASE STUDY

MULTI-AGENT HOTEL CONCIERGE

DIFY · GPT-4O-MINI

Question classifier routes each guest message to 3 function-calling agents (reservations, CFDI invoicing, availability) with memory and tools: hotel knowledge source, Google Sheets, Tavily, Wikipedia.

WINDOW

TRY IT LIVE

CODE

INTERNAL ASSISTANT + OWN MCP SERVER

N8N · OPENAI · CLAUDE

Webhook intake, classification sub-workflow and Switch routing to Slack, Notion, Gmail or Sheets; an LLM agent uses an MCP client against my MCP server (calendar, email, web search). Global error workflow alerts in Slack.

WINDOW

CODE

LEXMEX LEGAL RAG CHATBOT

LANGFLOW · ASTRADB · TEC

End-to-end RAG over the Mexican Federal Civil Code: chunking (1000/200), text-embedding-3-small, AstraDB vector store (top-4 similarity), gpt-4o-mini at temp 0.1 with a grounded “I don’t know” prompt.

WINDOW

CODE

LLMS INSIDE BUSINESS PROCESSES

MAKE · N8N

Voice agent (Vapi) that books meetings via webhooks and Google Calendar; invoice extraction to structured JSON into Sheets; automated meeting minutes; Telegram voice-note assistant.

WINDOW

CODE

CONCIERGE V2 IN LANGGRAPH

IN PROGRESSPYTHON

Porting the concierge to Python + LangGraph: RAG over a vector database, input/output guardrails, structured tax-data validation, human-in-the-loop approval with interrupt() and evaluation.

ROADMAP

● SKILLS

AI & AGENTS	LLMs · RAG · embeddings · vector DBs (AstraDB) · tool calling · MCP · LangChain · LangGraph · prompt engineering · OpenAI & Anthropic models · Dify · Langflow
AUTOMATION	n8n · Make · Power Automate · webhooks · REST APIs · SharePoint · Google Workspace integrations
DATA & BI	Microsoft Fabric · Power BI · DAX · Power Query (M) · SQL · Python (Pandas, NumPy) · PySpark · Databricks (Delta Lake) · Tableau · data warehousing · ETL/ELT · OLAP/OLTP
ERP & METHOD	Microsoft Dynamics 365 F&O · SCOR model · Lean Six Sigma (Black Belt) · predictive analytics

● PROFESSIONAL EXPERIENCE

Data Analytics Specialist

MARCH 2026 – PRESENT

Centro Internacional de Mejoramiento de Maíz y Trigo (CIMMYT)

- Built AI-powered data agents in Microsoft Fabric for business-area reporting, connected to live semantic models with governed, validated responses — [see recreation](#).
- Migrated a static Excel report requiring 16–20 hours of monthly manual preparation to Power BI Service, with 2-hour scheduled refresh and Row-Level Security by role.
- Built an automated comment-capture solution with Power Automate so users submit contextual comments inside the report and track them in the dashboard.
- Delivered two days of hands-on Power BI training to internal staff, covering star schema design and 28+ DAX measures.

● PROFESSIONAL EXPERIENCE (CONT.)

Supply Chain and Power BI Consultant

FEB 2025 – FEB 2026

GCG Consulting · Tren Maya project

- Led the implementation of integrated asset maintenance management solutions with Microsoft Dynamics 365 Finance and Operations, CRM Field Service and Power BI.
- Applied Microsoft's end-to-end process methodology for ERP deployments and coordinated with national and international vendors on the strategic Tren Maya infrastructure project.
- Ran process analysis sessions, translated business requirements into technical specifications, designed solutions with cross-functional consultant teams and trained key users.
- Developed Power BI dashboards to monitor critical KPIs for strategic decision-making — [RAMS preview](#).

Supply Chain and Microsoft Dynamics Finance & Operations Consultant

APR 2024 – OCT 2024

BPC Consulting

- Implemented Microsoft Dynamics 365 F&O for a manufacturing company, deploying Procurement and Sourcing, Warehouse Management and Sales modules.

Supply Chain and Operations Consultant

JUL 2022 – APR 2024

Indep Business Partner

- Executed a digital transformation success case recognized by Microsoft, guiding BACO (a leading stationery manufacturer) from requirements gathering to go-live.
- Applied the APICS SCOR framework to optimize business processes and trained operational and administrative teams in ERP usage.
- Implemented the Warehouse Management System in Dynamics 365 F&O (receipts, internal movements, shipments, picking) and designed WMS models for raw materials, WIP, finished goods and sales areas, improving inventory accuracy and traceability.

Health Care Compliance Intern

APR 2021 – FEB 2022

Johnson & Johnson

- Developed Power BI dashboards and Excel reports for business intelligence monitoring, reducing critical incidents by 30% through predictive analytics.
- Optimized processes through internal audits and report automation, improving data quality and governance; centralized information in SharePoint for regional teams.

Continuous Improvement Trainee

JUL 2019 – AUG 2020

I-Wey Textil

- Applied DMAIC to implement 5S in warehouses, achieving a 20% productivity increase; documented workflows in BPMN (Bizagi) and led a point-of-sale system implementation.

● APPLIED AI – TECNOLÓGICO DE MONTERREY

Artificial Intelligence Technologies Specialist

FEB 2026 – PRESENT

- Modules: generative AI fundamentals · prompt engineering & LLM agents · automated reasoning · metaheuristics · data preprocessing · unsupervised learning. Covers LLMs, RAG, multi-agent systems, LangChain, LangGraph and MCP, with exposure to Hugging Face and PyTorch.
- Deliverables: LexMex RAG chatbot ([window](#)) and a delivery-route TSP in Python comparing simulated annealing, a genetic algorithm and 2-opt hill-climbing ([results & code](#)).

● EDUCATION

B.Sc. Industrial Engineering — UNAM	2017–2022
AI Technologies Specialist — Tec de Monterrey	2026–
Lean Six Sigma Black Belt — UNAM	2024
